STI (Safety Technology International)

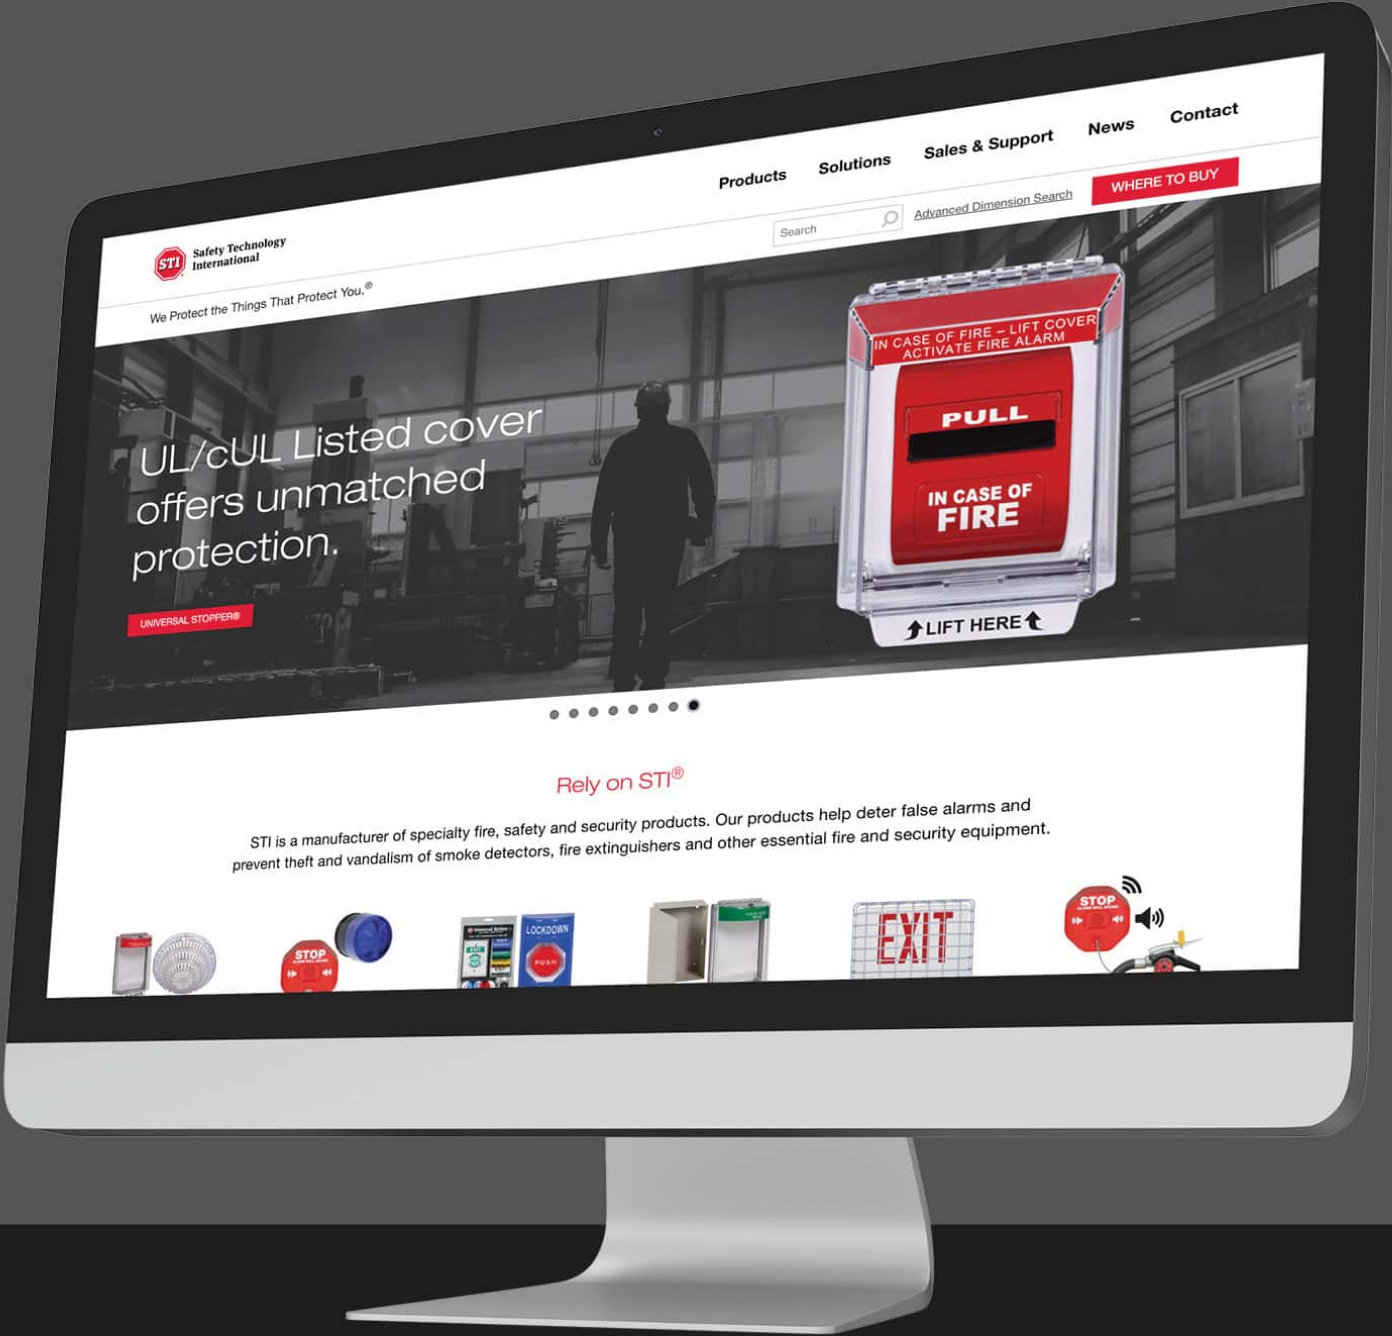

A Safety Pioneer Needed Focused Energy

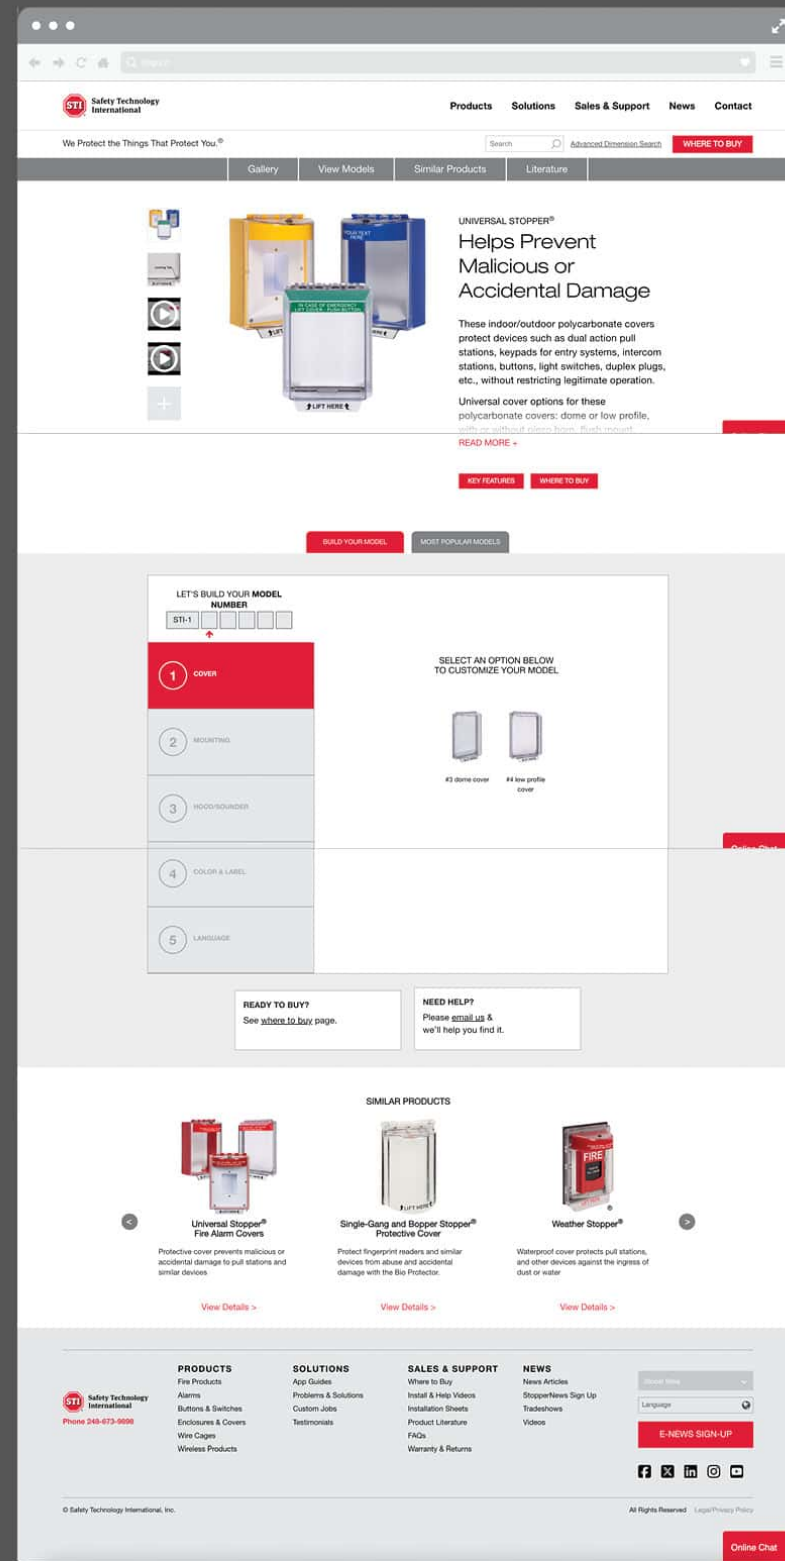

OBJECTIVE
Safety Technology International (STI) pioneered a device many of us take for granted. Their founder invented the "Stopper," which "stopped" teenagers from pulling the alarm at schools. Instead, the "Stopper" makes a loud noise, scaring off the prankster before the actual alarm is pulled, avoding costly false fire alarms.

SOLUTION
An American success story, STI built an international business offering thousands of products that keep people safe and secure. But along the way, its brand became piecemeal, unfocused. We built a cohesive brand identity system with a world-class website that positioned STI for sustained growth.

FIRE & SAFETY

COVERS & CAGES

BUTTONS & SWITCHES

HOME & WORK SERIES

VANDALISM & THEFT

Universal Stopper®

Indoor/outdoor polycarbonate cover helps stop false fire alarms without restricting legitimate operation of pull stations. It is ideal for schools, hospitals, nursing homes, stores, hotels and public buildings of almost every kind.

Other colors and models available. Three year guarantee against breakage of polycarbonate in normal use (one year on electro mechanical and electronic components).

Refer to Page 5 for further information.

DESIGN

Protective cover with horn. Prevents false fire alarms, without hindering legitimate operation of a manual pull station in the event of an emergency.

ELECTRONICS

95/105 dB self-contained alarm draws immediate attention to the area. Available with or without horn, powered by an included battery.

CONSTRUCTION

Tough, clear UV-stabilized polycarbonate material. Housing can take the severest knocks preventing vandalism or accidental damage to the manual pull station.

INSTALLATION

Quick & easy protection in minutes. Can accommodate flush or surface mount applications. Gaskets included.

1. Stopper II®

Protective cover prevents false fire alarms. Does not restrict legitimate access. Self-contained alarm.

PRODUCT INFORMATION

- Internal dimensions are shown in inches and are approximate.
- Polycarbonate products are UV-stabilized.
- Most products carry a lifetime guarantee against breakage in normal use.
- Electronics are backed by a one year warranty.

a proud history

It all started with a challenge

Nearly three decades ago a suburban Detroit school administrator asked our founder, Jack Taylor, to create a product to help stop false fire alarms.

the birth of the Stopper

Taylor and his associates got right to work on the challenge. The result was the world famous Stopper®, a clear plastic cover that helps prevent false fire alarms. Today, our Stopper® Line comprises of over 300 products to protect the things that protect you.

family owned and operated

Our company takes pride in our products and exemplary customer service. We work hard to make the world a safer place, one product at a time.

yes, we customize

STI still thrives on a challenge. If you don't see a product in this catalog that meets your needs, give us a call. We customize!

and you can still
